

# School of Labor and Employment Relations Climate Jobs Institute

The Climate Jobs Institute at the University of Illinois at Urbana-Champaign is helping Illinois chart a course to a clean energy future. Through applied research, we identify ways to minimize job loss, maximize high-quality job creation, promote economic development, and facilitate an equitable transition to a clean energy economy.

## What we research

Clean energy policy

Labor impacts

Climate justice

Quality job creation

## Who we serve

Clean energy workers

Community & advocacy groups

Policy makers

State & local governments

## What we produce

Research reports

Policy briefs

Tools for planning

Evaluation reports

## Why it matters

Illinois is undergoing a massive clean energy transition. Research produced by the Climate Jobs Institute will guide policy making and planning, inform program implementation, and promote an equitable transition for workers and communities.
